Equipment summary:

Leather torsion resistant testing machine is used to test the folding nature for various leather and fabric. The machine used to test the folding nature for various leather and fabric, Materials need be nipped both inside and outside, Twist and turn over and over again until a certain number, Observe the damage of the tested materials, this machine applied to use in clothing, shoes, bags and other thin material leather.

corresponding standard :

According to the standard BS-3144, JIB-K6545

Applicable industry:

Used to test leather performance in shoes, clothing, luggage handbag industry, research laboratories; commodity inspection, arbitration and technical supervision departments.

Technical parameters:

Size	70*45mm
Bending angle	22.5°±0.5°
Dimensions	78*50*40cm
Counter	LCD control
Machine weight	(A) 60kg (B) 78kg
power	AC220V 50HZ 0.2KW
Flexing grips	(A) 6 group sets, (B) 12 group sets
Speed	100±5cpm
usage industry	shoes, clothing, luggage handbag

ZhongLi Instrument Technology Co., Ltd.

Machine Certificate:

Company Introduction:

Zhongli Instrument Located in Dongguan, Guangdong, China. It is a collection development, research, production and sales of integrated lab testing machine.

Zhongli attaches great importance on the construction of independent R&D ability and technical force, and has already built up a professional work team possessing independent R&D ability in order to design and produce better products to meet customers' requirements. Our machines adopt advanced technology and have good quality with high detecting sensitivity, strong anti-interference ability, stable performance etc. Customization is available in Zhongli, and our engineers can design drawings for customers to meet special requirements, also we can design and install machines according to different production lines.

We adhere to the conception of "Customer First", regard meeting customers' requirements as a primary goal and contribute to providing perfect products and satisfying services to our customers.
